World comes to you

Does google pixel have live photos. How to use pixel live wallpaper. How to get pixel live wallpapers. Pixel 3 xl live wallpaper apkmirror. How to change wallpaper on google pixel.

"Meet Pixel 5, the ultimate Google phone with the speed of 5G.[2] It has the helpful stuff you need in a phone, with an extra boost of 5G speed. So you can download a movie in seconds,[3] take stunning ultrawide photos in any light, and keep going with an all-day battery that can last up to 48 hours with Extreme Battery Saver.[8] Pixel 5 also charges wirelessly,[6] keeps your data safe, blocks robocalls,[11] and is water-resistant.[10] It's the super helpful 5G Google cell phone at a helpful price. And it's an unlocked smartphone, so you can choose the data plan and carrier that work for you.[1] [1] Works with all major carriers. Contact carrier for details. 5G service is carrier dependent. [2] Requires a 5G data plan (sold separately). 5G service and roaming not available on all carrier networks or in all areas. Contact carrier for details about current 5G network performance, compatibility, and availability. Phone connects to 5G networks, but 5G service, speed, and performance depend on many factors including, but not limited to, carrier network capabilities, device configuration and capabilities, network traffic, location, signal strength, and signal obstruction. Actual results may vary. Some features not available in all areas. Data rates may apply. [3] Download speed claims based on testing videos from three streaming platforms. Average download time was less than sixty seconds. File sizes varied between 449MB and 1.3GB. Download speed depends upon many factors, such as file size, content provider and network connection. Testing conducted in an internal 5G network lab and on pre-production hardware in California in July/August 2020. Actual download speeds may be slower. [4] Enabling gameplay with cellular data may increase your mobile data usage up to 2.7GB/hr. Gameplay is service-, network-, connection-, and game-dependent, and may not be available for all games in all areas. Users may experience inconsistent gameplay. Stadia requires account creation. [5] Hotspot capability subject to carrier plan. [6] Qi-compatible. Wireless charger sold separately. [7] Designed to charge Qi-certified devices. Use of Battery Share significantly reduces Pixel battery life. Cases may interfere with charging and will reduce charging speed. Charge speeds may vary. [8] For "All day": Maximum battery life based on testing using a mix of talk, data, standby, and use of other features. Testing conducted on two major carrier networks using Sub-6 GHz non-standalone 5G (ENDC) connectivity. For "Up to 48 hours": Maximum battery life based on testing using a mix of talk, data, standby, and use of limited other features that are default in Extreme Battery Saver mode (which disables various features including 5G connectivity). Testing conducted on two major carrier networks. For both claims: Pixel 4a (5G) and Pixel 5 battery testing conducted by a third party in California in mid 2020 on pre-production hardware and software using default settings, except that, for the "up to 48 hour claim" only, Extreme Battery Saver mode was enabled. Battery life depends upon many factors and usage of certain features will decrease battery life. Actual battery life may be lower. [9] Android version updates for at least 3 years from when the device first became available on the Google Store in the US. [10] Pixel 5 has a dust and water protection rating of IP68 under IEC standard 60529. Charger and accessories are not water or dust resistant. Water and dust resistance are not permanent conditions and may be compromised due to normal wear and tear, repair, disassembly or damage. [11] US only. English only. Call Screen may not detect all spam calls. [12] Screen sharing not available on group calls. Requires Wi-Fi or 5G internet connection. Not available on all apps and content. Data rates may apply. 5G service, speed and performance depend on many factors including, but not limited to, carrier network capabilities, device configuration and capabilities, network traffic, location, signal strength, and signal obstruction. [13] Some third-party apps and data may not be transferred automatically. [14] Subscriptions may be required. [15] Not available for all apps and content. Display automatically adjusts to optimize for best viewing and battery performance. [16] Storage specifications refer to capacity before formatting. Actual formatted capacity will be less. [17] Maximum battery life based on testing using a mix of talk, data, standby, and use of other features. Battery life depends upon many factors and usage of certain features will decrease battery life. Pixel 4a (5G) and Pixel 5 battery testing conducted by a third party in California in mid 2020 on pre-production hardware and software, using default settings. Testing conducted on two major carrier networks using Sub-6 GHz non-standalone 5G (ENDC) connectivity. Actual battery life may be lower. [18] Qualcomm Snapdragon is a product of Qualcomm Technologies, Inc. and/or its subsidiaries. Qualcomm and Snapdragon are trademarks of Qualcomm Incorporated, registered in the United States and other countries. [19] Back housing only. [20] Up to 18W wired charging rates are based upon use of the included charger plugged into a wall outlet. Actual results may be slower. [21] Charging rates are based upon use of the included charger plugged into a wall outlet. Actual results may vary." Twelfth major version of the Android mobile operating system family Android 12A version of the Android operating systemScreenshotAndroid 12 home screen with Pixel LauncherDeveloperGoogleOS familyAndroidGeneralavailabilityOctober 4, 2021; 11 months ago (2021-10-04)[1]Latest release12.1.0_r27 (SP2A.220505.008)[2] / September 6, 2022; 5 days ago (2022-09-06)Kernel typeMonolithic kernel (Linux kernel)Preceded byAndroid 11Succeeded byAndroid 13Official websiteandroid.com/android-12Support statusSupported[3] Android 12 is the twelfth major release and 19th version of Android, the mobile operating system developed by the Open Handset Alliance led by Google.[4] The first beta was released on May 18, 2021. Android 12 was released publicly on October 4, 2021, through Android Open Source Project (AOSP) and was released to supported Google Pixel devices on October 19, 2021.[5][1][6] Android 12 is the third most popular Android version on smartphones at 11.97%.[7] The first phones to have Android 12 were the Google Pixel 6 and the Pixel 6 Pro. History Android 12 logo for Developer preview and Beta release Android 12 (internally codenamed Snow Cone)[8] was announced in an Android blog posted on February 18, 2021.[9] A developer preview was released immediately.[10][11] with two additional ones planned the following two months. After that, four monthly beta releases were planned, beginning in May, the last one of them reaching platform stability in August, with general availability coming shortly after that.[12] The second developer preview was released on March 17, 2021,[13] followed by a third preview on April 21, 2021.[14] The first beta build was then released on May 18, 2021.[5] It was followed by beta 2 on June 9, 2021,[15] which got a bugfix update to 2.1 on June 23.[16] Then beta 3 was released on July 14, 2021,[17] getting a bugfix update to beta 3.1 on July 26.[18] Beta 4 was released on August 11, 2021.[19] A fifth beta, not planned in the original roadmap, was released on September 8, 2021.[20] Android 12 stable got released on the Android Open Source Project on October 4,[1] getting its public over-the-air rollout on October 19, coinciding with the launch event for the Pixel 6.[21] Android 12L In October 2021, Google announced Android 12L, an interim release of Android 12 including improvements specific for foldable phones, tablets, desktop-sized screens[22] and Chromebooks, and modifications to the user interface to tailor it to larger screens. It was planned to launch in early 2022.[23][24] Developer Preview 1 of Android 12L was released in October 2021, followed by Beta 1 in December 2021, Beta 2 in January 2022, and Beta 3 in February 2022.[25] The stable version of Android 12L was released for devices with large screens on March 7, 2022, and was released as "Android 12.1" for Pixel smartphones on the same date, besides the Pixel 6 & Pixel 6 Pro.[26] Features See also: Android version history § Android 12 User interface Android 12 introduces a major refresh to the operating system's Material Design language branded as "Material You", which features larger buttons, an increased amount of animation, and a new style for home screen widgets. A feature, internally codenamed "monet", [27] allows the operating system to automatically generate a color theme for system menus and supported apps using the colors of the user's wallpaper.[28][29] The smart home and Wallet areas added to the power menu on Android 11 have been relocated to the notification shade, while Google Assistant is now activated by holding the power button.[28] Android 12 also features native support for taking scrolling screenshots.[28][30] In addition to the user interface, widgets on Android 12 are also updated with the new Material You design language.[31] Platform Performance improvements have been made to system services such as the WindowManager, PackageManager, system server, and interrupts.[28] It also adds accessibility improvements for those who are visually impaired.[28][30] The Android Runtime has been added to Project Mainline, allowing it to be serviced via Play Store.[30] Android 12 adds support for spatial audio, and MPEG-H 3D Audio, and will support transcoding of HEVC video for backwards compatibility with apps which do not support it.[30] A "rich content insertion" API eases the ability to transfer formatted text and media between apps, such as via the clipboard.[30] Third party app stores now have the ability to update apps without constantly asking the user for permission.[32] Privacy OS-level machine learning functions are sandboxed within the "Android Private Compute Core", which is expressly prohibited from accessing networks.[28] Apps requesting location data can now be restricted to having access only to "approximate" location data rather than "precise".[28] Controls to prevent apps from using the camera and microphone system-wide have been added to the quick settings toggles. An indicator will also be displayed on-screen if they are active.[28] See also iOS 15 macOS Monterey Windows 11 References ^ a b c "Android 12 has been released to the Android Open Source Project".
