SCIENCE QUESTION

What am I wondering about?

Independent Variable
(What will you change)

Dependent Variable
(What will you measure or observe?)

HYPOTHESIS

Make an educated guess that you can test. What do you think is going to happen?

1. _____
2. _____
3. _____

REAL WORLD USES

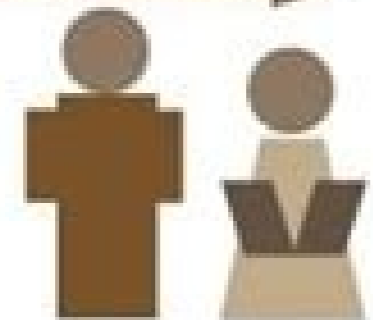

How might this experiment be useful in the real world? Who would benefit from this information?

- _____
- _____
- _____

Now in these days, a decree went out from Caesar Augustus, that a census be taken of all the inhabited earth. This was the first census taken while Quirinius was governor of Syria.

Bethlehem

And everyone was on his way to register for the census, each to his own city. Joseph also went up from Galilee, from the city of Nazareth, to Judea, to the city of David which is called Bethlehem, because he was of the house and family of David, in order to register along with Mary, who was engaged to him, and was with child.

While they were there, the days were completed for her to give birth. And she gave birth to her firstborn son, and she wrapped him in cloth, and laid him in a manger, because there was no room for them in the inn.

In the same region there were some shepherds staying out in the field and keeping watch over their flock by night. And an angel of the Lord suddenly stood before them, and the glory of the Lord shone around them, and they were terribly frightened.

But the angel said to them, "Do not be afraid, for behold, I bring you good news of great joy which will be for all the people. For today in the city of David there has been born for you a Son, who is Christ the Lord. This will be a sign for you: you will find a baby wrapped in cloth and lying in a manger."

And suddenly there appeared with the angel a multitude of the heavenly host, praising God and saying, "Glory to God in the highest, and on earth peace among men with whom He is pleased!"

When the angels had gone away from them into heaven, the shepherds began saying to one another, "Let us go straight to Bethlehem then, and see this thing that has happened which the Lord has made known to us." So they came in a hurry and found their way to Mary and Joseph, and the baby as he lay in the manger.

When they had seen this, they made known the statement which had been told them about the Child. And all who heard it wondered at the things which were told them by the shepherds, but Mary treasured all these things, pondering them in her heart. The shepherds went back, glorifying and praising God for all that they had heard and seen, just as had been told them.

Instructions

- 1. Cut around the thick black line
- 2. Fold along the dotted black line
- Further lesson-specific instructions can be written here

A4 Leaflet template

Notes

- ICT lesson
- Teachers can create a lesson template and then e-mail it to students
- This template is in A4 ready to print
- This template can be shown in PowerPoint on the board

Scroll to File > Print, then select your print options. If you don't see the options, click Show Details. If you want to print the same image or page multiple times, click "Number of copies per page" and select a number. To resize the image, click "scale" and then enter a percentage. To print only selected thumbnails, go to "Select Pages" in the side panel. Choose the right scale if you want to fill the map as much as possible. After changing the settings and options, click Print. Download FREE or buy PDFElement now! Download FREE or buy PDFElement now! Buy PDFElement now! Buy PDFElement now! I had a PDF file of a 47-page document that I wanted to make into a compact A5 book booklet... you know, one of the things to pull out a big stapler and do something like this: unfortunately, you have to print page 39 at the same wavelength as page 10, then pages 40 and 9. on the other side etc and when you are installing something from 4 sides it is difficult and time consuming to do it manually and correctly. My HP printer driver had a "booklet" function and it worked fine for 8 pages, but I got frustrated when I gave more. Now you can buy services that can do this, but why would I spend a quid or two when I could use a few otherwise profitable hours to create it myself? So here's my solution, which could be a lot neater, but that's the only tricky part of the job: getting the pages in the right order. This is a script automaton that you can runService: After installation, you can correctly -pdf and choose the services and find the "PDF brochure" option. It creates a new PDF on the computer with properly mixed pages. Then you can print this preview this way: Go to the dialog box system. Now select a double -page print setting to customize the double option connected to a short binding. note: You need to understand how it works before the attempt! It wasn't difficult and I could make it much more beautiful and descriptive, but I used a machine that was so far from the real programming language that it was annoying. However, there are several useful ways to replace PDF files without installing anything else, and my Betim will tell you at least part of the information below. (If you read it in 2022 or younger, remember that you will definitely want to continue reading the update below the news!) Fortunately, if necessary, you can easily add an empty page to the preview. Select the last page and select Edit-> Paste> Empty page as often as needed and then save it. If the number of pages is wrong, the script will warn you. Then, when you run the script, it will create a folder called a brochure on the desktop. Here he will create a PDF file for each side of your document. Finally, he will decide what the sequence of these pages should be and create a new brochure. Then you can remove the brochure folder. Here is a jump file containing automation of concrete. If you want to see what is located in it, you should be able to double and open it in the machine, but I think if you put it in ~/library/service in the main catalog, it will probably appear as a service in the area if right -click PDF File Finder. Make a PDF brochure at descop.zip (for before -MAC), I hope someone will work! Sorry, I will not provide any support if you try, but we expect suggestions and improvements from anyone with greater auto communications resistance than me! The only thing I can say is that I work great in my Mac with Wysokie Sierra (10.13.6). Some updates: Read all of the above updates: If you do such things, you can also like MacOS PDF movie.The tricks I made in 2016, but people think they are still useful. Update in the April 2022 version: MacOS version 12.3 and a newer version does not contain Python 2, which is dependent on this script, and the Python 3 has not updated the automator to make it as insignificant as it should be. I However, I have created an updated version working on my Mac. I hope someone can verify that they work for them too! (See below. For MacOS 12.3 and younger. Download this zip file: Create a PDF booklet on your desktop - 2022b.Zip. Your browser may leave for you. If not, double -click the zip file to open the workflow "Create a PDF booklet on the desktop". Double -click and you will be asked if you want to set up as "fast action". Then, as mentioned above, you need to copy ~/library/service in your folder and find it in the folder. Right -running sub -Menu is provided to PDF. Did you like this news?
